

World Class, Flexible Business Solutions

based on
Industry Best Practices
& Operational Excellence

WHO WE ARE

iPower is dedicated to helping our customers achieve their vision. We assist our customers in improving what they do and how they do it by implementing strategic improvements based on industry best practices in services and system/software engineering.

iPower provides world-class professional consulting services including program management support, systems engineering and technical assistance (SETA) services, continuous improvement and business process re-engineering; and acquisition, con-tracts, and financial management support. Since our founding, over 150 organizations in government and industry have trusted us to bring their processes to the next level and beyond.

We build trusted and long-term relationships with our clients through the delivery of premier services and products. Achieving success in today's highly competitive market requires the competence to maximize every technological and operational advantage. We consistently receive re-peat business and the highest assessments from our clients—the best testimony for our capacity to deliver relevant, flexible business solutions based on government and industry best practices, standards, and operational excellence.
